

Mechatronics Department

Courses: **MTE 405** and **MTE 506**

Dear students,

We were all have been affected by the quarantine measures to prevent the spread of COVID-19. Online streaming of my labs was a potential solution during this period. Unfortunately, this is not feasible from university network. Therefore, the temporary solution will be:

- Starting from **Saturday, 21/03/2020**, lab will be recorded and uploaded along exercises to the GitHub repository. You may expect the lab at **late Sundays** or **Mondays** for editing and uploading time.
- If you hold any questions, open an issue on the GitHub course and I will respond when possible.

- Regrading classwork, I will ask for assignments, to deliver it:
 - Create a **private** repository and invite me to it.
 - Upload all your assignments to your repository.
- Fill in this form as soon as possible as it will help in forming a new assignment system:
MTE 405 students only :

MTE 506 students only:

- An attempt to solve the online streaming is to be carried on Saturday. You are welcome to attempt to communicate with me (*I will send a link if it works*). Either way, you will get the lab recording along files by the dates as agreed.
- I will also try to embrace the university **moodle LMS** although it is still suffering from serious issues.

Good luck,
